**Course Title: Software Project Management** 

Course no: CSC-408 Full Marks: 60+20+20 Credit Hours: 3 Pass Marks: 24+8+8

**Nature of course:** Theory (3Hrs.) +Practical (3Hrs.)

Course Synopsis: Concept of software project, software project management framework

**Goal:** This course introduces the concepts of Software Project, software project management framework, project evaluation, Software quality assurance and project management and its tools.

#### **Course contents:**

# **Unit-1: Introduction to Software Project Management (SPM)**

5 Hrs.

Software engineering problem and software product, software product attributes, Definition of a Software Project (SP), SP Vs. other types of projects activities covered by SPM, categorizing SPs, Project management cycle, SPM framework, types of project plan

#### **Unit-2: Project Organization, Scheduling and management issues**

5 Hrs.

Project life cycle and product life cycle, project planning and scheduling, resource allocation

# **Unit-3: Project Evaluation & Estimation:**

6 Hrs.

Cost benefit analysis, cash flow forecasting, cost benefit evaluation techniques, risk evaluation. Selection of an appropriate project report; Choosing technologies, choice of process model, structured methods, rapid application development, water fall-, V-process-, spiral- models. Prototyping, delivery

# **Unit-4: Activity planning**

7 Hrs.

Objectives of activity planning, project schedule, projects and activities, sequencing and scheduling activities, network planning model, representation of lagged activities, adding the time dimension, backward and forward pass, identifying critical path, activity throat, shortening project, precedence networks

#### **Unit-5: Resource allocation**

4 Hrs.

Introduction, the nature of resources, identifying resource requirements, scheduling resources creating critical paths, counting the cost, being specific, publishing the resource schedule, cost schedules, the scheduling sequence.

# **Unit-6: Monitoring the control**

4 Hrs.

Introduction, creating the frame work, collecting the data, visualizing progress, cost monitoring, earned value, prioritizing monitoring, getting the project back to target, change control

# **Unit-7: Managing contracts and people**

5 Hrs.

Introduction, types of contract, stages in contract, placement, typical terms of a contract, contract management, acceptance, Managing people and organizing terms: Introduction, understanding behavior, organizational behavior: a back ground, selecting the right person for the job, instruction in the best methods, motivation, working in groups, becoming a team, decision making, leadership, organizational structures, conclusion, further exercises.

# Unit-8: Software quality assurance and testing

5 Hrs.

Testing principles and objectives, test plan, types and levels of testing, test strategies, program verification and validation, software quality, SEI-CMM,SQA activities, QA organization structure, SQA plan.

### **Unit-9: Project management and project management tools**

4 Hrs.

Software configuration management, SCM tasks and roles, Risk management, risk management process, SPM tools.

Laboratory Work: Project on Software Project Management
